How to use AI to turn your Google reviews into a lead generation machine -- mode: tip-led

EMAIL PREVIEW

Hey {{first_name}},

Quick gut check.

When's the last time your Google reviews actually brought you a new client -- not just sat there?

Most gyms and studios treat reviews like a trophy case.

Collect them. Forget them. Move on.

Here's the thing --

The AI Growth Loop treats reviews as a lead source, not decoration.

It drafts a personalized reply to every new review within minutes, so your profile stays active -- Google rewards that.

It flags a rough review privately the second it lands, so you can make it right before it costs you rankings.

And it pulls the exact phrases happy clients used -- "best coaching I've had," "actually saw results" -- and turns them into content you can reuse.

Why it matters: businesses ranking in the top 3 local spots average 47 reviews. The ones stuck at positions 7-10 average just 38.

This works best if you're already getting a steady trickle of reviews -- if you're starting from zero, the fix looks different (ask me).

Want me to put together a custom AI + marketing plan for {{business_name}}? Book a quick discovery call.

Talk soon,

Dylan | Digigrowth

P.S. -- this isn't a sales pitch, just 20 minutes to see if The AI Growth Loop is a fit for {{business_name}}.
