TOPIC THIS WEEK

The AI follow-up sequence that books consultations while you sleep -- mode: proof-story-led

EMAIL PREVIEW

Hey {{first_name}},

Confession: most follow-up doesn't fail because someone's lazy.

It fails because a lead messages at 9pm on a Tuesday, and nobody's there to catch it.

The old way: a lead goes cold overnight, then gets a rushed callback the next afternoon -- if they get one at all.

The AI Growth Engine works the opposite way.

It replies in the moment the lead reaches out, then keeps the conversation moving until a call lands on your calendar.

Picture a small independent practice running late-night DMs and missed calls through a sequence like this instead of a shared inbox.

No one has to wake up to answer a Sunday-night message anymore.

The system replies right away, asks a couple of qualifying questions, and drops a link straight onto the calendar.

By the time the practice opens Monday, there's already a discovery call booked from over the weekend.

That's not a hypothetical.

It's just what happens when follow-up doesn't have to wait for a human to be at a desk.

Here's the thing...

This works best for businesses that book 1:1 appointments -- consultations, intro sessions, discovery calls.

If that's not how you sell, this one's not for you.

Want me to put together a custom AI + marketing plan for {{business_name}}?

Book a quick discovery call and I'll show you what The AI Growth Engine would look like running in {{business_name}}.

Talk soon,

Dylan | Digigrowth

P.S. -- this isn't a sales pitch, just 20 minutes to see if it's a fit.
